

## MEMBERS GUIDE FOR EMBRYO INVENTORY ENTRY

In the Embryo inventory members can:

A. Keep track of all your CLA-genetics embryo inventory and the DNA-related registration qualifications.

B. Pedigree estimate EPDs as well as non-parent trait rankings also provided based on current EPDs.

C. List embryos for sale by private treaty.

D. Sell and Transfer embryos directly to the buyers account

**Flush records are required to register embryo calves and must be uploaded here or emailed to the CLA office to put on record.**

1. Navigate to <https://cla.digitalbeef.com>

2. Click "Breeding"

### 3. Click "Embryo Inv"

### 4. Embryo Inventory Screen shows you all the information about the embryos on hand.

The screenshot shows the 'Embryo Inventory' screen. At the top left is the 'CANADIAN LIMOUSIN ASSOCIATION' logo. The page title is 'Embryo Inventory'. Below the title, there are instructions: 'Keep track of all your CLA-genetics embryo inventory and the DNA-related registration qualifications. Pedigree estimate EPDs as well as non-parent trait rankings also provided based on current EPDs. & Records marked with PTL are currently listed as for sale on the private treaty listings.' There is an 'Add new Embryo' button.

13. On this screen you can see if the dam and sire both meet the DNA bylaw requirements. If they do not contact the CLA office and we can advise you on what needs to be completed.

65. Donor dams must meet the following criteria: (a) All donor dams with a flush date prior to January 1, 2021 must be sire verified; (b) All donor dams with a flush date after January 1, 2021 must be parent verified; and (c) All donor dams in embryo production on or after January 1, 2015 must have a protophyria genotype on file with the Association.

66. If the donor dam is not owned or leased by the applicant (person applying for registration of the resulting calf), an embryo transfer of ownership must be on file with the association before the calf can be registered.

All sires that are used to create the embryos must meet CLA AI sire bylaw requirements. Bulls born prior to January 1, 2021 need to be Sire Verified. Any born after this date must be Parent Verified. All AI Sires must be proto tested or proto normal by pedigree.

**Embryo Inventory**

- Keep track of all your CLA-genetics embryo inventory and the DNA-related registration qualifications.
- Pedigree estimate EPDs as well as non-parent trait rankings also provided based on current EPDs.
- & Records marked with **PTL** are currently listed as for sale on the private treaty listings.

Embryo calves are special. So special things need to happen to have the performance data included in the genetic evaluation. IGS will include weaning weight and yearling weight data in the evaluation if the recipient dam is identified with a permanent number and breed fraction and age data on file. The recipient is fit for maternal effects in the model, donor dam for direct effects. If no recipient ID is on file the result is that none of this calf's data is included in evaluation.

17. Enter the transplant date
